

Agentra AI Services Brief

Custom Applied AI for Small and Mid-Sized Businesses

Agentra partners with small and mid-sized operators to turn messy, high-effort workflows into governed AI systems that pay for themselves in weeks. Our teams combine strategy, engineering, and change enablement so your finance, operations, and customer teams get leverage without hiring a data-science department.

- Average client payback: 11 weeks from pilot launch.
- Typical manual hours reclaimed: 1,800+ per month across finance, operations, and customer support.
- Regulatory-ready delivery: SOC 2-aligned controls, optional HIPAA BAAs, and clear data ownership.

Engagement Framework

Phase	Duration & Investment	Key Outputs	Decision Gates
1. Diagnostic Lab	2 weeks · fixed fee	Use-case backlog, data readiness report, ROIC model	Go/no-go pilot based on ROI & data health
2. Pilot Sprint	4–6 weeks · flat + platform fee	Production-like MVP, adoption analytics, enablement kit	Expand/kill/Reshift target view
3. Scale & Operate	Ongoing subscription tiers	New automations, drift monitoring, quarterly reports	Quarterly business review & compliance

Copilot-in-the-Loop

- Context-aware assistants embedded in Gmail, Outlook, HubSpot, or Zendesk that summarize threads, draft replies, and log CRM notes in one click.
- Tone, compliance, and escalation guardrails tuned to each client's brand and regulatory profile.
- Adoption dashboard plus “human-in-the-loop” controls so advisors can accept, edit, or reject suggestions.

Automation Blueprints

- Event-driven workflows that watch ERPs, CRMs, and spreadsheets for changes, then trigger approvals, Slack nudges, or API calls.
- Delivered on n8n, Make, Zapier, or custom code with runbooks, observability, and rollback plans.
- Ideal for payables, collections, onboarding, and scheduling teams that still rely on swivel-chair work.

Insight Hubs & Private Search

- Secure analytics layers where leaders query plain-language prompts against live business data.
- Includes data contracts, lineage diagrams, model cards, and audit logs to satisfy finance and IT.
- Optional predictive layers for demand planning, underwriting, or staffing forecasts.

Change Enablement & Upskilling

- Live workshops, sandbox environments, and SOPs so every employee understands how to use and challenge AI recommendations.
- 30/60/90 adoption plans tied to CSAT and revenue metrics.

Trust, Security, & Compliance

- Privacy-by-design delivery: data minimization, encryption, RBAC, and data residency options.
- Model red-teaming, bias tests, and monitoring with automated kill switches.
- DPAs, SOC 2 report sharing, HIPAA-ready controls, and vendor risk documentation for procurement teams.

Recent Wins

- Healthcare network: Clinical inbox copilot reduced triage time by 37% while maintaining HIPAA compliance.
- Wholesale distributor: Predictive replenishment engine cut excess inventory by 15% and lifted forecast accuracy to 92%.
- Regional lender: Risk analyst copilot saved 55 hours per week and eliminated manual PDF review errors.

Next Steps

Ready to explore a workflow? Book a complimentary Diagnostic Lab intake and we will map your ROI, data readiness, and the first automation we can pilot inside 45 days.
